<p>Are you in favor of continuing the existing program or replacing the trees all at once?</p> 	51/54.3%	26/25.5%	<p>Leaning toward existing program:</p> <p>Would like to have a program continue, but not take all trees down at once as it makes the neighborhood look barren. We would support an assessment.</p>	<p>Leaning toward replacing trees all at once:</p> <p>I'm not for or against replacing slowly or all at once. If we save money by doing it all at once we should do that. The trees grow fast. I wouldn't mind paying for my tree replacement out of pocket.</p>	<p>I'm in favor of a special assessment but also in favor of replacing trees on a rolling basis so we don't have brand new trees all at once across the neighborhood.</p> <p>Replace trees only as determined by certified arborist that a given tree is seriously ailing or damaged.</p> <p>If VAPM is struggling financially we should only replace trees that are diseased, dead or problematic, with consultation with arborists</p> <p>Reevaluate whether necessary. I am not an arborist and I do not know what is in our best interest.</p>

					<p>I'm amiable to replacing all trees at once or replacing fewer trees per year if our finances don't allow replacing 10 trees per year.</p> <p>I do not have a strong opinion either way</p> <p>The way the question is written is not very clear to me</p> <p>I'd like more information</p> <p>Leave them alone</p> <p>Is there a way not to continually replace trees?</p> <p>I'm not convinced this is necessary at all</p> <p>Can we just leave the trees alone?</p> <p>No opinion – HOA is spending a lot of money on cutting trees down. The process</p>
